DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action filed 10/25/2006 is persuasive and, therefore, the finality of that action is withdrawn.

Status of Application/Amendment/Claims

Applicant's response filed 02/26/2007 and claim amendments filed 04/23/2007 have been considered. Rejections and/or objections not reiterated from the previous office action mailed 10/25/2006 are hereby withdrawn. The following rejections and/or objections are either newly applied or are reiterated and are the only rejections and/or objections presently applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

With entry of the amendment filed on 02/26/2007, claims 1, 5, 10-13, 30, 33 and 36 are pending in the application. Applicant has canceled claims 2-4, 6-9, 34-35 and 37-46.

Response to Applicant's Arguments

Re: Claim Rejections - 35 USC § 101

The rejection of record mailed in the action on 10/25/2006 of claim 13 under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter is obviated in response to amendments filed 04/23/2007.

Re: Claim Rejections - 35 USC § 112

The rejection of claim 36 is rejected under 35 U.S.C. 112, first paragraph, is obviated in response to amendments filed 04/23/2007.

Re: Claim Rejections - 35 USC § 102 or 35 USC § 103

The rejection of claims 1, 2, 5, 10-13, 30, 33, and 36 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wallach et al. (of record) is maintained for the reasons of record in the action mailed 10/25/2006.

Applicant's arguments filed 02/26/2007 have been fully considered but they are not persuasive. Applicant argues the examiner's conclusion that the four wild card nucleotides of the sequence taught by Wallach et al. does not represent a small genus because the four wild card sequences could result in 256 different species and 256 species are not considered a small genus. Applicants further argue that nothing in the Wallach et al. reference would point one of skill in the art the instantly claimed specie.

At the outset, the small genus referred to in the action mailed 10/25/2006 is not the different species of the claimed DNA sequence, as argued by applicant. The small genus is the small genus of DNA encoding a TRAF-binding protein as compared to the entire genus of all DNA encoding any protein. Therefore, because Wallach et al. teach a small genus of DNA encoding a TRAF-binding protein, the claimed species i.e. SEQ ID NO. 4, is considered to be in the possession of the public. Thus, Wallach et al. anticipates the instant claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
